Subject: Harbor wide tasks

Hi Madi,

I talked to Hunter last week and wanted to give you an update as well. (b) (6)
so I am a little behind on the HxCDF PTW and sequencing tasks.

I will be sending you an update today for the HxCDF PTW threshold task. Malena has completed the figures and I just need to look things over before getting it over to you.

I am still completing the sequencing updates and will not be ready to present the revised sequencing during tomorrow's weekly team meeting. I am requesting that we hold off on presenting sequencing to the rest of the EPA team until next Thursday.

Additionally, Hunter mentioned (b)(5)

I'm not sure if that changes anything but I will proceed with the updates as discussed previously unless told otherwise.

Hope you enjoyed your time off and are having a reasonably slow transition into work 😊

Thanks!
